

3 Survival Tips for Ransomware

74% of companies made ransomware part of its security strategy.¹

BUT

55% of companies have yet to train their employees to combat ransomware.¹

#1 Survival Tip

Revisit the 3-2-1 Backup Rule

3 copies of important files

2 different storage methods

1 copy offsite

#2 Survival Tip

Disconnected, Unplugged, or Invisible

Don't store backups on the same network.

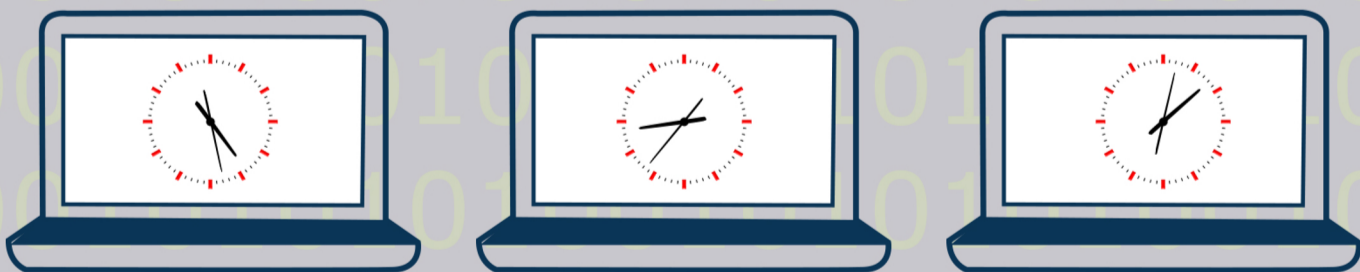

It will find your servers, and when it does, it will *encrypt them*.

#3 Survival Tip

Allow Rollback to the Last-known Good State

Be able to pinpoint the exact time of infection to pull up the most recent backup prior to the attack.

81% of companies have technology in place to combat ransomware.¹
