

HELPING YOU EXTRACT THE MOST VALUE FROM EACH IT ASSET

CLIENT DEVICE LIFECYCLE MANAGEMENT

The decision to use standard client devices and platforms across a company brings with it the promise of greater consistency and affordability along with it. Yet, fulfilling that promise often requires you to keep a very close watch on key aspects of each product's lifecycle.

That's where WEI comes in. WEI enables you to squeeze the most value out of each IT asset through careful management of device lifecycle phases. This includes keeping you up to date on end-of-life announcements, availability, and roadmaps for all the products on which you plan to standardize. As one product phases out, we even help you coordinate and strategize your next replacement model.

When it comes to giving you and your organization the best value during each phase of the device lifecycle, there is an array of lifecycle management options and services to choose from:

Early Lifecycle Management

- Large rollout schedules and plans
- Imaging/asset tagging
- Secure VPN network validation
- Custom packaging

On-Going Lifecycle Management:

- Management of dashboards, reports, and portals
- Project management and reporting
- Upgrades and add-ins
- Support cases

End-of-Life Lifecycle Management:

- EOL (End of life) and EOS (End of service) briefings
- Trade-in and asset destruction
- Refresh plans and/or accessory refresh

ABOUT WEI

**WEI is an innovative,
full service, customer centric
IT solutions provider.**

**Why WEI? Because we care.
Because we go further.**

At WEI, we're passionate about solving your technology problems and helping you drive your desired business outcomes. We believe in challenging the status quo and thinking differently.
