

AN EXTENSION OF YOUR TEAM WITH TECHNICAL EXPERTISE AND A COMMITMENT TO OPERATIONAL EXCELLENCE.

PROJECT MANAGEMENT

No matter what your industry is, WEI can support your business' evolving technology needs with services provided by the finest certified engineers in the industry. Large discount warehouses and distributors don't have the hands-on approach required to deliver customized solutions. Having a box show up on your dock at the end of the project with your new technology inside is not a valuable model.

After assessing your environment and developing an overall plan of action and solution, a project plan is created by WEI's project management team. WEI will organize an efficient schedule with your company. They will also assist in organizing services, ordering necessary products that best fit your needs, documenting scope changes, and modifying your solution plan if needed. WEI methodology includes all of the steps needed to make sure your solution is exactly the way you need it and that it's ready to operate on the day it arrives.

Integration

All parts and interoperating equipment are integrated at WEI's integration Lab. All special requests are accommodated, including: OS versions, image loading, firmware revisions, extended burn-in testing, special cabling, and many other steps designed to optimize performance.

Staging

Equipment can be staged and powered on for extended periods of time when required (data center builds, moves, etc.). WEI can provide access remotely or on-site for customer involved fine tuning and testing. Additional hands-on training can be conducted at this time.

ABOUT WEI

**WEI is an innovative,
full service, customer centric
IT solutions provider.**

**Why WEI? Because we care.
Because we go further.**

At WEI, we're passionate about solving your technology problems and helping you drive your desired business outcomes. We believe in challenging the status quo and thinking differently. There are a lot of companies that can take today's technology and create a great IT solution for you. But we do more. We go further. And we have the customer, vendor and industry awards to prove it. WEI is a premier technology partner, who always puts our customers first while providing the most innovative solutions for over 25 years.

Rack & Stack

Full solution stacks can be built out and delivered as complete, integrated cabinets. This process includes racking of all gear, complete cabling based on desired structured cabling schemes and best practices, and full power and interconnectivity testing. The complete cab will be labeled to the custom specifications you need.

Technical Services

Additional technical configuration needs can be added including loading IPs, adding OSs, naming and labeling servers, and configuring any logical components of the solution stack.

Surveys, Asset Tracking & Reporting

All equipment that goes through the WEI integration lab is surveyed. A capture is done of all configurations and layouts, serial numbers, firmware levels, revision levels, and warranty start and stop dates. All of that data is archived and can be delivered to the customer in any desired format including customized reports or secure online portals.

WEI will collaborate with your company to produce customized, winning strategies. It is our aim to offer services that help your project run as smoothly as possible.
