WEI Strategic Workforce Overview

Extend your IT team and strengthen operations to drive desired business outcomes

IT organizations are expected to modernize infrastructure, support distributed users, strengthen cybersecurity, adopt AI, and push cloud initiatives—all while managing day-to-day operations with limited staff and budget.

Keeping pace requires operational expertise, specialized resources, and ongoing support to keep critical systems running while freeing internal teams.

Whether you need to optimize infrastructure operations, provide onsite technical support across multiple locations, or supplement your team with specialized IT talent, WEI delivers the expertise and accountability to help you move your business forward. This portfolio is built around WEI's approach as a trusted advisor of your IT team.

MANAGED SERVICES, COLOCATION & CONNECTIVITY

Managing today's hybrid IT environment requires coordinated management across infrastructure, cloud, connectivity, providers, and consumption-based services.

Experience a unified approach to managed services, enterprise connectivity, cloud and colocation advisory, and technology consumption models. This includes proactive monitoring and Day Two operations to WEI Connect (powered by Starlink), HPE GreenLake, carrier management, and FinOps. WEI serves as a single operational partner focused on maximizing the value of your technology investments. Soften supply chain delays, improve contract and vendor management.

Core Capabilities:

Managed Services	Satellite Connectivity	Colocation & Cloud Advisory	HPE GreenLake	Data Center Consulting
Cloud Consulting	Connectivity Brokerage Services	Telecom Expense Management	FinOps & Provider Management	

WEI Strategic Workforce: Extend Your IT Team

Extend your IT capabilities with engineering-led managed services, colocation, connectivity, technical resourcing, and field services coordinated by WEI.

Rely on one accountable partner, backed by 35+ years of enterprise IT experience.

IT TECHNICAL RESOURCING

Hiring skilled IT professionals takes time, but technology initiatives can't wait.

Quickly access experienced tech professionals who can integrate with existing teams. Whether supporting infrastructure modernization, cloud migration, DevOps initiatives, AI projects, or temporary staffing gaps, WEI provides workforce solutions that accelerate project delivery while reducing hiring delays.

WEI also offers technical apprenticeship programs that help organizations build long-term and diverse technical talent pipelines.
