

## Enterprise-Resilient Connectivity: Always On. Anywhere, Fast.

*WEI Connect, powered by Starlink, allows you to connect anywhere, connect fast and stay connected. We bring the integration visibility, support, and operational control enterprise teams expect.*

For most enterprises, connectivity is still a constant fight: Long installation lead times, costly and unreliable primary internet, expensive backup internet, fragmented ISPs across locations, poor visibility, and deployment timelines that move in months, not days. Add rigid data plans with no pooling, device shortages that delay installs, and it only takes one outage to disrupt mission-critical operations.

With WEI Connect, powered by Starlink, you can deploy cost-effective primary and backup connectivity in days, not months, without sacrificing security, uptime, or performance.

### Why Enterprises Choose WEI Connect

While Starlink provides powerful hardware and Internet, it takes a trusted IT partner to make it consumable at the enterprise level. Unlike typical telecom providers, WEI Connect delivers reliable, always-on connectivity with built-in resiliency. Operate with fiber-like speeds and low latency, giving your business the continuity it expects. At the same time, WEI Connect simplifies operations with customized data plans and billing, along with a tailored dashboard that provides real-time telemetry, monitoring, and control.

#### Value-Added Services Overview

- Customized usage plans that right-size connectivity for each site, from low-usage branches to mobile deployments.
- Real-time monitoring and telemetry to track usage, latency, throughput, and link quality, with a centralized dashboard.
- Installation services that include rooftop, wall, vehicle, or sled-mounted options, plus structured cabling and integration with existing infrastructure.
- Comprehensive managed services with 24/7 monitoring, remote configuration, firmware updates, and helpdesk integration.

## WEI Connect

We make Starlink  
Enterprise-ready.

Gain resilient, always on connectivity across every site, so you can grow and operate without delays.

Cost-effective primary +  
backup internet

Custom + pooled enterprise  
data plans

Fully managed deployments

24x7 proactive operations

Enterprise analytics +  
realtime visibility

One provider, same service  
everywhere, anytime

## Proven Integration and Support

WEI Connect offers 24x7 expert support and stocked inventory to ensure rapid deployment, fast replacements, and reduced business disruptions. With 4,000+ certified field techs across North America, our preconfigured rapid deployment kits can be installed quickly by local technicians. For organizations standardizing on modern

WAN architectures, WEI validates and integrates Starlink with leading SD-WAN and SASE platforms—including Cisco, HPE Aruba Networking, Fortinet, Palo Alto Networks, and Cato Networks—ensuring that every deployment meets enterprise standards.

### Enterprise Use Cases

WEI Connect operates anywhere your business is.

- **Rural & Remote Sites:** Extend connectivity to offices, clinics, and branches where fiber is unavailable.
- **Retail & Pop-Ups:** Activate seasonal locations, new stores, or temporary sites in days instead of months.
- **Healthcare Deployments:** Connect mobile clinics and rural care sites with secure internet access that supports patient-critical workloads.
- **Emergency & Mobile Operations:** Provide on-demand connectivity for disaster recovery, command centers, and field logistics when terrestrial networks fail.
- **SD-WAN & SASE Integration:** Add path diversity and resilience to modern WAN architectures, enabling dynamic failover, traffic steering, and secure cloud access.

### Enterprise Use Cases

WEI will provide information on each Starlink device, via API and dashboard:

- Data usage and overage
- Ethernet link speed
- Directional alignment
- Obstructions
- Thermal conditions
- Power disconnect detected
- Software update reboot pending
- Downlink/Uplink throughput
- Latency
- Signal quality
- Ping drop rates

## Built for the Moment: Get Enterprise-Resilient Connectivity with WEI Connect

Your organization can't afford to downtime or waiting months for traditional connectivity. WEI Connect lets you move at the speed of business, fitting seamlessly into how your business already operates. Gain operational confidence at every location. Stay connected across all sites. Be ready for anything, everywhere you operate.

*Take the next step toward a more reliable, future-ready network. Contact WEI today to schedule a consultation and explore how we can extend secure, high-performance connectivity to every corner of your business.*
