# WEI Strategic Cloud Assessment

## Strategic Cloud Assessment & Roadmap

Transform your cloud strategy into a competitive advantage with a clear, actionable roadmap tailored to your business goals.

Evaluate your current IT environment, establish cloud priorities, and develop a strategic roadmap for modernization, migration, optimization, or hybrid cloud transformation. Led by WEI’s certified cloud architects, our Strategic Cloud Assessment aligns business objectives, technical requirements, operating models, and financial goals to deliver a clear, actionable path forward across AWS, Microsoft Azure, Google Cloud, and hybrid multi-cloud environments.

### OVERVIEW

Organizations often know they need to modernize, optimize, or transform their environment, but lack a clear plan for where to start, what to prioritize, and how to align cloud decisions to business outcomes.

WEI’s Strategic Cloud Assessment provides a structured review of current infrastructure, application portfolio, cloud readiness, security and compliance requirements, governance model, and operational maturity to identify opportunities and define next steps.

Through discovery workshops, stakeholder interviews, and technical analysis, WEI evaluates technology constraints, migration candidates, modernization opportunities, cloud economics, and target-state architecture options.

Dimension	Description
Business Alignment	Align cloud strategy to business priorities, growth plans, risk tolerance, and operating goals.
Cloud Readiness	Assess technical, organizational, and operational readiness for cloud adoption or expansion.
Architecture	Review current infrastructure, application dependencies, and target-state design options.
Governance	Evaluate security, compliance, financial management, and operating model needs.
Modernization	Identify migration candidates, modernization opportunities, and optimization areas.
Roadmap	Define phased initiatives, sequencing, and priorities for migration and transformation.

### STRATEGIC CLOUD ASSESSMENT & ROADMAP

#### Our Review Process:

A strategic cloud assessment is designed to help you understand your current environment, priorities, and best steps for transformation.

#### WHAT YOU RECEIVE

- Current-state cloud and infrastructure assessment
- Cloud readiness and maturity evaluation
- Application portfolio and dependency review
- Prioritized recommendations aligned to business goals
- Strategic roadmap for modernization and migration
- Executive summary and stakeholder readout

#### WHY WEI?

- Deep expertise across AWS, Azure, Google Cloud, and hybrid environments
- Strong cloud architecture, migration, modernization, and governance experience
- Ability to align technical strategy with business priorities
- Practical recommendations backed by engineering expertise
- End-to-end support from assessment through execution

**WEI Is Your AWS Select Tier Services Partner.**

### THREE-STEP REVIEW PROCESS

**Step 1 — Discover:** WEI conducts discovery sessions with business and technical stakeholders to understand the current environment, business priorities, cloud goals, application landscape, operational model, and existing constraints. This phase establishes the baseline needed to evaluate readiness, identify gaps, and determine the highest-value strategic opportunities.

**Step 2 — Assess:** WEI analyzes infrastructure, applications, security posture, governance model, cloud economics, and modernization candidates to identify risks, dependencies, and opportunities. The assessment includes a current-state review, maturity observations, and recommendations aligned to business and technical priorities.

**Step 3 — Roadmap:** WEI delivers a strategic roadmap with prioritized initiatives, target-state considerations, and recommended next steps for migration, modernization, optimization, governance, and operating model evolution. The roadmap is intended to guide decision-making, reduce transformation risk, and establish a clear plan for execution.

## STRATEGIC CLOUD ASSESSMENT

### Well-Architected Reviews

Review and remediate your cloud to meet best practices.

Clarify cloud priorities	Reduce transformation risk	Improve business and IT alignment
--------------------------	----------------------------	-----------------------------------

### Our Review Process

A strategic cloud assessment is designed to help you evaluate where you are today and define a practical roadmap for modernization, migration, and optimization.

Discover	Assess	Roadmap
WEI gathers business, technical, and operational inputs through workshops and stakeholder discussions.	WEI evaluates cloud readiness, architecture, governance, security, and modernization opportunities.	WEI delivers prioritized recommendations and a strategic roadmap aligned to business outcomes.

### Core Dimensions

Business	Readiness	Architecture	Governance	Modernization	Roadmap
Align to strategic goals	Assess change readiness	Review current and target state	Evaluate control and operating model	Identify migration opportunities	Prioritize next steps
